

Jordan Christley

Full-Stack AI Engineer & Independent Consultant

jordan@jordanchristley.com | linkedin.com/in/jordanchristley | github.com/jordanchristley | jordanchristley.com

SUMMARY

AI-native full-stack engineer building production systems that combine LLM orchestration, autonomous agent design, and Cloudflare-native infrastructure into end-to-end business tools. Specializes in RAG pipelines, multi-agent workflow orchestration, and browser automation.

TECHNICAL SKILLS

- **Languages:** Python, TypeScript, Rust, JavaScript, SQL
- **Frontend:** React, Next.js, Redux, Tailwind CSS, Playwright
- **Backend:** Node.js, NestJS, Express, FastAPI, Python APIs
- **AI / ML:** RAG Pipelines, LLM Orchestration (Claude, OpenAI), Vector Databases, Embeddings, AI Agent Design, Prompt Engineering
- **Infrastructure:** Cloudflare Workers / D1 / R2 / KV, AWS (Lambda, S3, RDS, CloudFormation), Docker, Kubernetes, Terraform, GCP
- **Databases:** PostgreSQL, SQLite / D1, Redis, Supabase, MongoDB
- **Automation:** Playwright, Puppeteer, FFmpeg, Email Automation, Notion API
- **Domains:** Real Estate Tech, CRM, SaaS, Billing / Stripe, Meeting Transcription & Task Extraction

EXPERIENCE

Emerald Technology

2022 — Present

Independent Consultant

- Architected and shipped AI-powered systems combining LLM orchestration, autonomous agent design, and Cloudflare-native infrastructure for end-to-end business tooling.
- Built multi-agent workflow engines with real-time collaboration, review dashboards, and automated task extraction from meeting transcripts.
- Developed full-stack real estate technology platforms with deal tracking, CRM integration, and automated outreach pipelines.
- Designed RAG pipelines with vector databases and embeddings for semantic search across business knowledge bases.
- Delivered Cloudflare Workers / D1 / R2 / KV serverless stacks with sub-50ms cold starts and zero-ops maintenance.

Booster

May 2022 — 2023

Software Engineer

- Built and maintained a fundraising platform connecting nonprofits with corporate sponsors, processing donations and managing campaign workflows.
- Developed backend services with NestJS and frontend interfaces with React, ensuring type-safe end-to-end data flow.
- Integrated LLM-powered features for content generation and donor engagement analysis.
- Collaborated with product and design to ship user-facing features on aggressive two-week sprint cycles.

Bayer Crop Science

Dec 2020 — 2022

Full Stack Developer

- Developed digital agriculture tools serving farmers and agronomists with real-time field data visualization and decision support.
- Built React and Node.js applications on AWS (Lambda, S3, RDS, CloudFormation) handling high-throughput geospatial data.

- Implemented automated data pipelines for satellite imagery processing and yield prediction models.
- Led frontend architecture decisions and mentored junior developers on React best practices and testing strategies.

EOG Resources

Apr 2019 — Oct 2020

Frontend Developer

- Built React applications for oil and gas exploration teams, visualizing well data, production metrics, and geological surveys.
- Developed automated testing bots with Playwright and Puppeteer to regression-test internal dashboards.
- Mentored junior developers through code reviews, pair programming, and internal tech talks on modern frontend practices.

Flatiron School

Aug 2018 — Oct 2020

Technical Coach

- Coached cohorts of 15–20 students through full-stack web development curriculum covering JavaScript, React, Ruby on Rails, and SQL.
- Led weekly code reviews and debugging sessions, helping students build production-quality portfolio projects.

KEY PROJECTS

Resource Realty / 500 Deals

Full-stack real estate technology platform with deal tracking, CRM, automated outreach pipelines, and AI-powered market analysis.

Hermes Agent

Autonomous AI agent infrastructure with multi-agent orchestration, tool use, and persistent memory across collaborative workflows.

Review Dashboard

Real-time review system for AI-generated outputs — envelopes, verdicts, and automated application of approved changes.

Meeting-to-Tasks

Pipeline that ingests meeting transcripts, extracts actionable items with context tagging, and batch-creates structured tasks in Notion.

Outreach Automation

Automated email and CRM outreach system with lead discovery, contact enrichment, and personalized campaign sequencing.

EDUCATION

Coder Camps

2016 — 2017

MEAN Stack Certification

Houston Community College

2014 — 2016

Associate in Computer Science

CERTIFICATIONS

- **Learning How to Learn** — Coursera
